NexxZr T Multi facial cut-back by Bernardo Carrera & Dr. Rony Strimling

NexxZr T Multi facial cut-back
by Bernardo Carrera & Dr. Rony Strimling

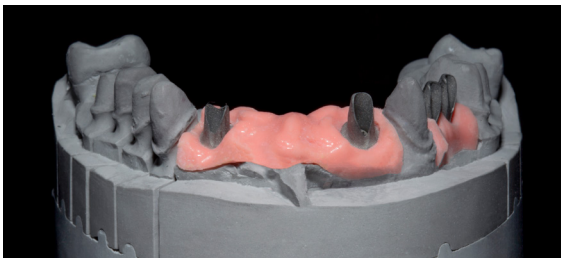

Sagemax experience

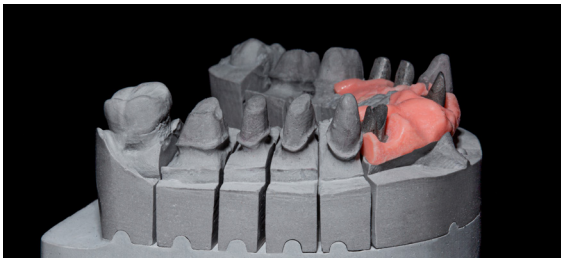

Initial situation

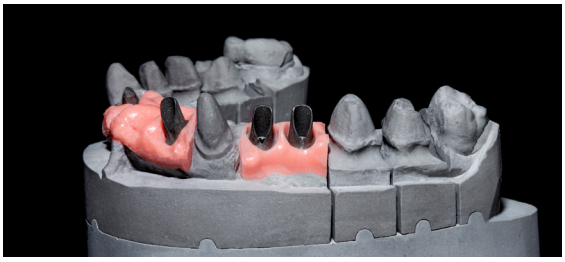

62-year-old female patient with severe periodontal problems that required tooth extraction and the insertion of implants in the anterior and posterior region.

Model and framework fabrication

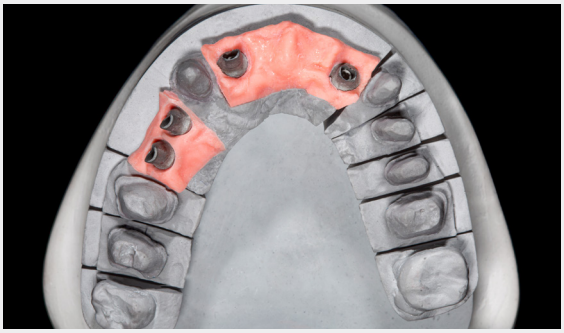

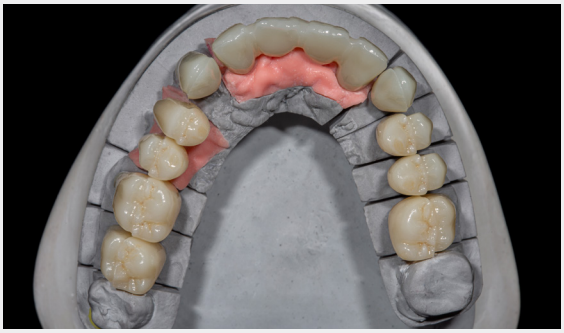

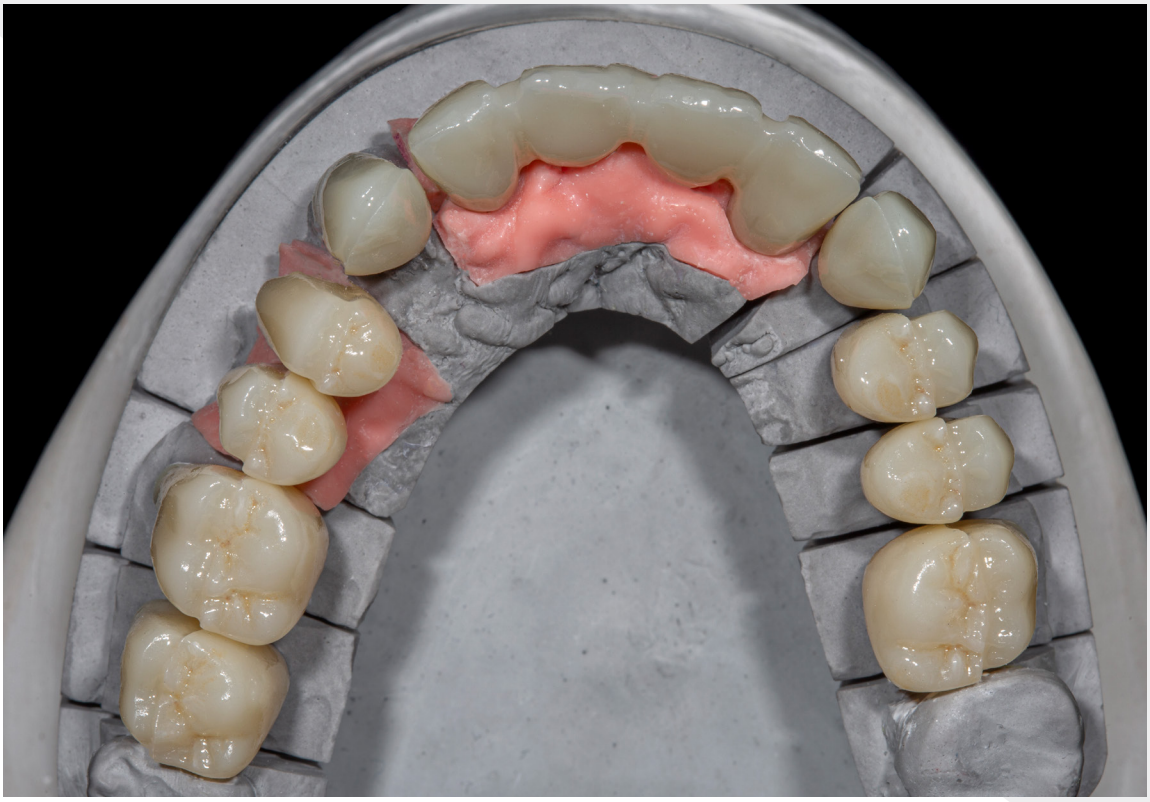

Fabrication of the master model with gingival mask and the zirconium framework with facial cut-back made of NexxZr T Multi.

Stain, glaze & wash firing

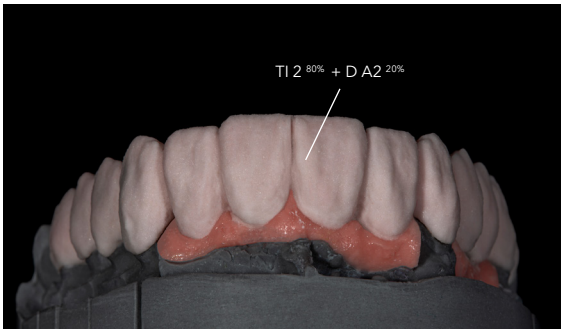

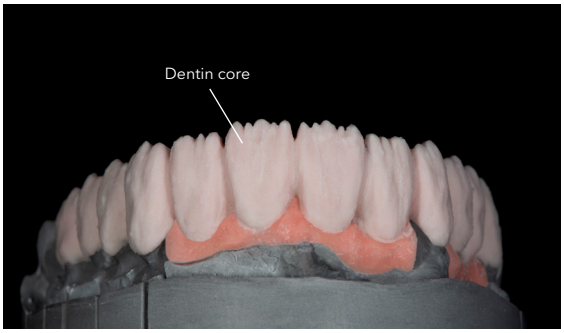

Staining and glazing of the monolithic parts; characterization and wash firing of the facially reduced parts with IPS Ivocolor (Co. Ivoclar).

Ceramic layering

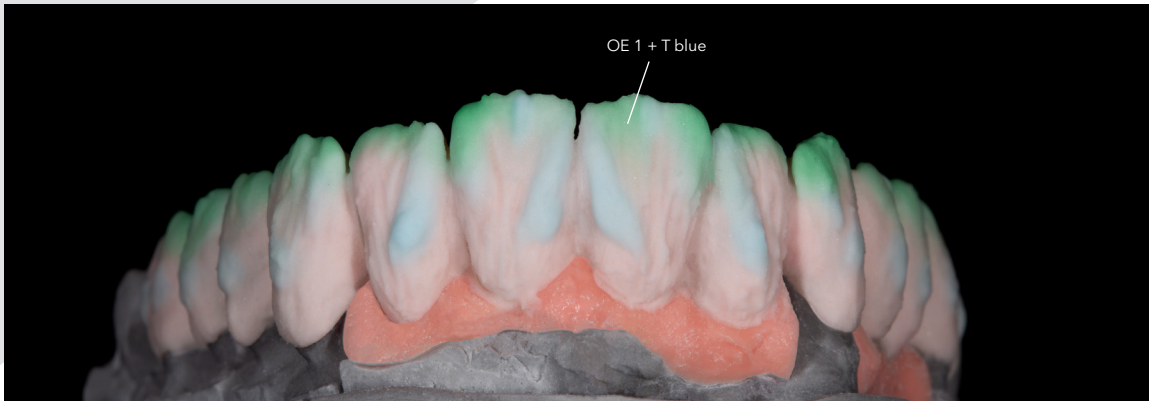

Fully anatomical ceramic application with IPS e.max Ceram (Co. Ivoclar).

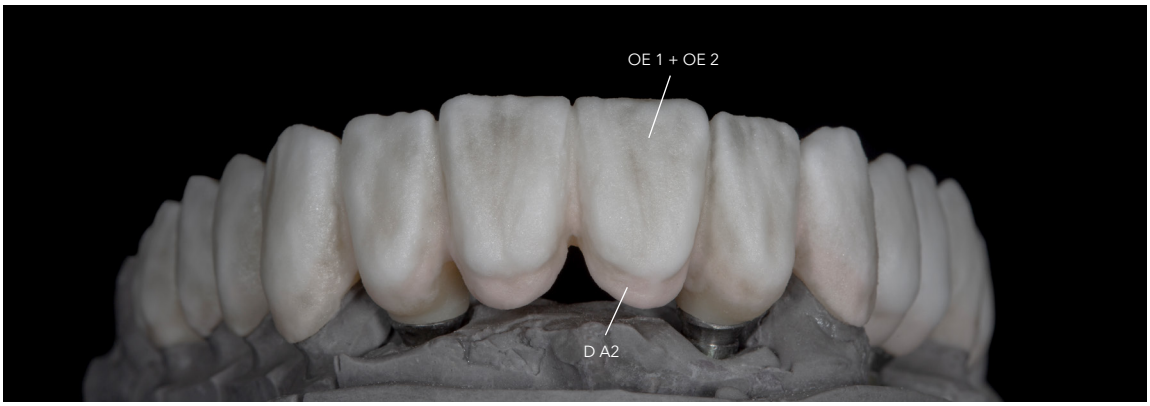

Reduction of the incisal parts and shaping of the dentin core.

Simple ceramic layering for age-appropriate vitality of the restorations.

Finished restorations

Finished crowns and bridges with natural vibrancy and good coverage of the dark abutments.

Final result

Before.

After.

The finished restorations fit perfectly into the oral cavity. The patient is beaming with a new smile and was very happy with the result.
